

**ATTACHMENT B**  
**Amendments to the Claims**

*This listing of claims will replace all prior versions, and listings, of claims in the application.*

1.-15. (Cancelled)

16. (Original) Method of treatment of a patient suffering from a form of depression, particularly endogenous depression, comprising administering to the patient any one of the following combinations of components:

- I. A, B and C or C'
- II. A and B
- III. B and C or C'
- IV. A and C or C'

wherein

- A is an antidepressant,
- B is vitamin B12, and
- C is a precursor or inducer of a neurotransmitter (other than L-tryptophan),
- C' is L-tryptophan,

said components being administered simultaneously or separately, in amounts which in combination have the effect of ameliorating the depression.

17. (Original) Method according to claim 16 wherein the depression is chronic depression or acute (severe) non-psychotic depression.

18. (Currently Amended) Method according to claim 18, wherein A is an antidepressant exhibiting SSRI or SNRI activity.

19. (Original) Method according to claim 18, wherein A is lofepramine, fluoxetine, citalopram or paroxetine.

20. (Currently Amended) Method according to any one of claims 16 to 19, wherein B is in the form of cyanocobalamin or hydroxycobalamin.

21. (Currently Amended) Method according to any one of claims 16 to 20, wherein C is L-phenylalanine, L-tyrosine or tyramine.

22. (Original) Method according to claim 16, wherein the combination of components is L-tryptophan and a SSRI.

23. (Original) A pharmaceutical composition for treatment of depression having a combination of pharmaceutically active components consisting only of or including any one of the combinations set out in claim 16.
